

AMENDMENTS TO THE CLAIMS

Claims 1-9. (Cancelled)

Claim 10. (Original)

A communication system which is capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, the communication system comprising:

a cellular phone comprising:

a recording device which records connection information for making communication connection to the communication apparatus on the network;

a transmitting device which sends the connection information to a communication terminal;

a first receiving device which receives information from the communication terminal; and

a first transmitting and receiving device which sends and receives information to and from the communication apparatus on the network; and

a communication terminal comprising:

a second receiving device which receives connection information for making communication connection to the communication apparatus on the network from the cellular phone; and

a second transmitting and receiving device which sends and receives information to and from the communication apparatus on the network based on the connection information received from the cellular phone.

Claim 11. (Original)

The communication system according to claim 10, wherein the connection information includes at least one of a dial-up telephone number, attribute information, a URL, an IP address, gateway information and a DNS.

Claim 12. (Previously Presented)

A communication system which is capable of sending and receiving information to and from a communication apparatus on a network via a cellular phone, the communication system comprising:

a cellular phone comprising:

a recording device which records a menu of destinations of communication and connection information for making communication connection to the communication apparatus on the network associating pieces of the connection information with each other;

a transmitting device which sends the menu to a communication terminal;

a first receiving device which receives information from a designated communication terminal on the network; and

a first transmitting and receiving device which, upon receiving the information of the designated communication apparatus on the network from the communication terminal,

performs dial-up connection to the communication apparatus on the network and sends connection information and thereafter send and receive information to and from the communication apparatus on the network; and

a communication terminal comprising:

a second receiving device which receives the menu of destinations of connection for making communication connection to the communication apparatus on the network from the cellular phone;

an inputting device which designates the communication apparatus on the network; and

a second transmitting and receiving device which sends information of the designated communication apparatus on the network to the cellular phone and connects communication to the designated communication apparatus on the network to send and receive information.

Claim 13. (Original)

The communication system according to claim 12, wherein the connection information includes at least one of a dial-up telephone number, attribute information, a URL, an IP address, gateway information and a DNS.

Claims 14-19. (Cancelled)

Claim 20. (Previously Presented)

The communication system according to claim 10, wherein said communication terminal is a digital camera unit.

Claim 21. (Previously Presented)

The communication system according to claim 20, wherein said digital camera further comprises:

a display for displaying connection information received from the cellular phone, wherein the user selects a destination for a digital photographic image based on the displayed connection information.

Claim 22. (Previously Presented)

The communication system according to claim 20, wherein said digital camera further comprises:

a mode switching element, which switches between a photographing mode for generating a digital image, and a communication mode for communicating a digital image to a destination based on connection information received from the cellular phone.

Claim 23. (Previously Presented)

The communication system according to claim 12, wherein said communication terminal is a digital camera unit.

Claim 24. (Previously Presented)

The communication system according to claim 23, wherein said digital camera further comprises:

a display for displaying a menu of destinations received from the cellular phone,
wherein the user selects a destination for a digital photographic image based on the displayed menu of destinations.

Claim 25. (Previously Presented)

The communication system according to claim 23, wherein said digital camera further comprises:

a mode switching element, which switches between a photographing mode for generating a digital image, and a communication mode for communicating a digital image to a destination based on the menu of destinations received from the cellular phone.
